

## KRT2024-01 Roof Replacement Amendment 2

Clarification- KRT's roof measurement is approximately 6,900 square feet, with three sections.

KRT will change the requirements for installation and material-

- Adhere 3" ISO to concrete decking on main section, approximately 5,900 square feet.
- Adhere an 1/8" tapered insulation system with 1/4" crickets at curbs to reduce ponding between drainage points on main section.
- Mechanically fasten 3" ISO to metal decking on lobby portion and clock tower, approximately 1,000 square feet.
- Mechanically fasten an 1/8" tapered insulation system with 1/4" crickets at curbs to reduce ponding between drainage points to metal decking on lobby portion and clock tower.
- Remove and install new 30" x 36" (rough opening) galvanized steel roof hatch.
- Minimum manufacturer warranty of 20-years for labor and materials upon completion
